

MCHP Researcher & Staff Accreditation- 2021

By December 1, 2010 everyone with access to an MCHP computer system and all Principle Investigators on projects being carried out at MCHP must have completed an MCHP Accreditation Session. This is a requirement for all: researchers, staff and analysts working on approved projects, accessing the Manitoba Population Research Data Repository housed at MCHP, and must be completed annually.

The purpose of the MCHP Researcher and Staff Accreditation is to provide a consistent overview of MCHP and the data access and use process. It covers the MCHP mission, available data (Data Repository), and requirements for data use and publication of results developed from the MCHP Repository. The accreditation process includes signing the University of Manitoba PHIA Pledge of Confidentiality, as well as an agreement that you understand and will follow the process for doing research at MCHP.

There is an online version of the accreditation session to review at any time.
